

Reference (the registration number from the file management system for foreign nationals in France; this must be provided in any correspondence):

Once your VLS-TS long stay visa is validated, you are eligible to receive preventive medical care from the health department of the institute of higher education where you are enrolled.

It is recommended that you complete this medical visit within four months of your arrival in France.

It will involve a general clinical exam as well as questions about your personal and family history and other health risk factors. Screening for communicable and noncommunicable diseases will be proposed depending on any risks that may be identified.

Advice and information about health and the French healthcare system may be provided by the institute of higher education where you are enrolled.

nationals in France; this must be provided in any correspondence):

On 11/09/2025, you validated your VLS-TS long stay visa and paid the fees for your initial residence permit:

Type: ETUDIANT
